

MY ROLE AS AN ASTEK

01.

Student Support and Assistance

- Assisting students with technical problems and understanding projects.
- Debugging and advice on good development practices.
- Support in learning tools and working methods.

02.

Supervision and pedagogy

- Explanation of technical and methodological concepts.
- Referral to relevant resources to promote autonomy.
- Encouragement of self-reflection and problem-solving.

03.

Technical and Organizational Support

- Help with development environments, configurations and tools (Git, Linux, Docker, etc.).
- Handling common technical problems encountered by students.

04.

Mediation and Communication

- Act as a link between students and the teaching team.
- Report any difficulties encountered and suggest solutions for improvement.
